BUSINESS OPPORTUNITIES FROM ISRAEL

November-December 2018

Company Name	Newsight Imaging (68133)
Contact Person	Initial contact will be made through the Federation of Israeli Chambers of Commerce: Ms. Yonat Keren International Relations Division Telephone: 972-3-5631020 Email: yonatk@chamber.org.il
Website	www.nstimg.com
Year of Establishment	2016
No. of Employees	27
Offer No.	94330
Summary of offer	<i>Export: Advanced Image Sensor Chips</i>
<p><u>Description of Offer</u></p> <p>The young Israeli SME develops advanced CMOS image sensor chips for various industries such as: automotive, robotics, AGV (self-propelled high speed train), barcode readers, industry 4.0, AR/VR (augmented/virtual reality), surveillance and depth cameras. They develop advanced CMOS sensor chips for machine vision. The chips are adjusted to function using a laser or Led light source to provide a real 3D image, creating a cloud of points that allows the depth, a depth map. The company's chips' sensitivity is higher than any other current solution in the market. Combined with high resolution and processing algorithms on the chip, it allows the reach of 40 thousand frames per second.</p> <p>The company owns a cutting-edge technology, with advantages in sensitivity, performance and low power consumption compared to other market solutions, leading the innovative front while also making the technology affordable by reducing the price significantly. The company's patents enable high sensitivity for long range distance using eye safe laser, while also improving immunity to sunlight and blinding cars. The patents</p>	

include the core eTOF (Enhanced Time-of-Flight) technology for distance measurement that bridges the gap between short-distance iTOF, and the long-distance requirement of the automotive industry, by extending the dynamic range while retaining high accuracy.

The company's CMOS sensor is an excellent solution for the above applications, which require highly sensitive with superb pixel technology. Their CMOS image sensor-based chips are ideal in robotics, such as industrial cleaning, manufacturing robots, home cleaning robots, smart toys and games, drones and accessories.

Affordable CMOS image sensor-based chips can be customized for high volume markets in the autonomous home appliance robots (vacuum cleaning & mopping robots), industrial robots & smart manufacturing that require high precision & resolution and automotive visual safety solutions (AFS intelligent adaptive front-lighting system, smart mirrors).

The innovative chip is ideal for applications that require cost efficiency – for high volume and competitive markets, low power consumption – for rechargeable and battery-operated products, high performance – for application that require intensive algorithms and calculations, analogue and digital integration – for non-disruptive coexistence.

The company employs professionals in the fields of semiconductor industry, sensor technology, chip design, computer engineering, optics, etc. The company is headquartered in Israel, has offices in some cities of China to support and develop their business there.

Potential Partners	<ul style="list-style-type: none"> • Distributor/Agent/Representative (companies), with experience/ knowledge in industrial applications of the developed 3D sensor solutions: automotive, robotics, barcode scanners, AR/VR-markets (headset manufacture) under distribution services / commercial agency agreement; • Investor, Financial/Investment Groups/Banks/Big Industrial Companies in the fields of application (automotive, robotics, barcode scanners, AR/VR-markets (headset manufacture)) under financial agreement; • Big Industrial Companies/Integrators in automotive, robotics, barcode scanners, AR/ VR-markets (headset manufacture) under joint venture / subcontracting agreement; • Various Companies/Clients interested in use of new product advantages, with possible customizing.
Target Countries	Worldwide.

Company Name	Technolite Ltd. (52724)
Contact Person	Initial contact to be made via the Federation of Israeli Chambers of Commerce: Ms. Yonat Keren International Relations Division Telephone: 972-3-5631020 Email: yonatk@chamber.org.il
Website	www.tlite.co.il

Offer No.	94331
Summary of offer	<i>Export:</i> Lighting Design, Lighting Manufacturing, LED Profile Lighting, Custom Manufacturing
<p><u>Description of Offer</u></p> <p>We are a second-generation lighting company, we design light solutions for homes, offices, hotels and stores.</p> <p>We have a range of products that will meet every client's needs and specifications, and we are constantly designing and creating new lighting products.</p> <p>Our company has a team of experts in the fields of lighting, design, architecture and lighting manufacturing. We create the best product possible using cutting edge technologies and materials.</p> <p>Our company stands out in designing products with a philosophy of innovation, attention to details and exceptional value. We start from the top and perfect even the smallest of details right through the ease of installation and packaging choices.</p> <p>We are looking for distributors of lighting products and Integrators of Interior Design Projects.</p>	
Potential Partners	Distributors of lighting products Integrators Distributors of ceiling fans Importers of lighting fixtures
Target Countries	Worldwide

Company Name	Smufs Biometric Solutions (67165)
Contact Person	Initial contact to be made via the Federation of Israeli Chambers of Commerce: Ms. Yonat Keren International Relations Division Telephone: 972-3-5631020 Email: yonatk@chamber.org.il
Website	www.smufsbio.com www.biometric.co.il
Year of Establishment	2012
No. of Employees	7
Offer No.	94332
Summary of offer	<i>Export:</i> Mobile Biometric Device called SMUFS - Secure Mobile Universal Fingerprint Scanners and NBBS Network Base Biometric Server
<p><u>Description of Offer</u></p> <p>The mobile biometric device called SMUFS (Secure Mobile Universal Fingerprint Scanner) is a secure and mobile compact self-powered, standalone fingerprint scanner. It can be used in remote areas where access to computers/laptops and internet is limited.</p> <p>The company's key features:</p> <p>Connects easily with any Smartphone/tablet/PC via Bluetooth, Wi-Fi or USB.</p> <p>On board flash allows on board storage and matching capabilities.</p> <p>FIPS 201/PIV compliant fingerprint sensor that is suitable for most demanding clients 1: N authentication challenges.</p> <p>Raw-image/WSQ/template on device.</p> <p>We offer: The secured mobile fingerprint scanner is a compact, self-powered, standalone fingerprint scanner capable of functioning over Bluetooth and USB interfaces. It can work with regular computers and laptops over USB, providing PIV certified images. It also acts as a portable mobile scanner with your smart phone/tablet. The device can be used in remote areas where access to computers/laptops and internet is limited. By attaching it to any smart phone, it is capable of enrolling new users and even running 1:1 and 1:N matches on the spot through the NBBS server connected over a GPRS network. NBBS exposes the strength of each plugged-in algorithm, while compensating for any weakness by using alternate algorithms. It exposes an easy to use API, which hides the complications of learning different algorithm interfaces. It is capable of extracting and matching fingerprints, face and iris scans.</p>	

The founders took the challenge of developing a very reliable and fast authentication system along with access into databases, using multiple, simultaneous unique algorithms. The development process included design, miniaturization, packaging and server development and working with experts in the relevant fields. Unlike existing costly solutions, the company offers full biometric solutions that can stand alone or be integrated with the customer's existing systems. We offer high quality, easy to use and easy to implement solutions, at a low cost.

Potential Partners	IT integration, biometric vendors.
Target Countries	Worldwide

Company Name	B.I.S. Advanced Software Systems Ltd. (19382)
